Pension administrator AZL improves invoice process

Keeping track of invoicing and administration is a challenge for many companies. AZL's billing system was costly and cumbersome and did not directly match AZL's specific requirements. The implementation of a change required a lot of time, manual work and was error-prone. As a solution Bizzomate built two applications that could completely replace the existing billing system. The payment processing application ensures that pension funds can easily register invoices to AZL. As soon as the invoice is registered, it moves through to the invoicing application automatically. Incoming invoices are now automatically scanned, the employee only has to check and approve the data. This leads to a higher accuracy and faster turnaround time!

Value

- ✓ Operational efficiency
 - ↳ Cost saving
 - ↳ Time saving
- ✓ Insight and overview

Investment

- ✓ Continuous improvement

How

- ✓ Strong focus on user-friendly interface
- ✓ Mendix application
- ✓ Integration core pension system Oracle
- ✓ STP / robotization mutations
- ✓ Four-eyes principle

Connections

- ✓ Oracle
- ✓ Mendix Customer Portal
- ✓ Webservices.nl
- ✓ Ricoh scan
